**Subject:** Labelling of Irradiated Food

Dear Food and Drug Administration,  
Please mandate clear, prominently displayed labeling for all food that has been treated in whole or in part by irradiation. As a consumer I am entitled to quickly and easily know if such a process has been used without having to read fine print which my aging eyes have increasing trouble reading.

I am also entitled to know if such products have been used when ordering from a menu without having to ask the wait staff for an unreliable answer.

Please put the interests of consumers before the interests of industry. Mandate complete, accurate labeling for all food products in regard to irradiation.

Thank you.

Sincerely,  
Chris Stevens
